+91 – 9023745031

Fourth-year B.Tech student at Parul University with strong technical skills in full stack web development. Proficient in HTML, CSS, JavaScript, and React.js for building responsive and dynamic user interfaces. Experienced in basic backend development and REST API integration. Skilled in using Git and GitHub for version control, code collaboration, and application deployment. Solid understanding of responsive design principles, debugging, and modern web development practices. Seeking an entry-level software or web developer role. With ongoing learning in backend development to grow as a full-stack engineer.

Education

B.Tech, Computer Science & Engineering 2021-26
Parul University, CGPA – 7.11/10

12th (Senior Secondary Examination) 2021
GSHEB Board, 78%

10th (Secondary Examination) 2019
GSHEB Board, 85%

Technical Skills

- Programming Languages – C, C++, Python
- Web Technologies – HTML, CSS, JavaScript, React, Bootstrap, JQuery, SASS, Redux, Node.js

Experience

Full-stack Web Development intern, Unified Mentor Pvt Ltd, Haryana Dec'25-Feb'26

I have internship experience as a Full Stack Developer, with a strong focus on building efficient and responsive user interfaces using HTML, CSS, JavaScript, and React. Implemented basic backend logic and integrated APIs. Used Git for version control and GitHub for code management and deployment. Followed software development lifecycle and best coding practices. I also have basic hands-on exposure to backend development with Node.js and am motivated to further strengthen my backend skills while contributing to scalable, real-world full-stack applications.

Web Development intern, Cognifyz Technologies, Nagpur, Maharashtra Nov'25

Built responsive websites using HTML, CSS, and JavaScript. Created static and dynamic web pages with clean, structured code. Added interactivity and improved UI/UX with JavaScript. Assisted in debugging, testing, and optimizing front-end code.

Projects

Mini Sales CRM Aug-Dec'12

Developed a mini Sales CRM application to manage leads and customer information efficiently using HTML, CSS, and JavaScript. Implemented CRUD operations with real-time updates through DOM manipulation and event handling. Designed a responsive and user-friendly interface to improve sales tracking and data organization.

Weather App

Developed a responsive web-based weather application using HTML, CSS, and JavaScript, integrating the OpenWeatherMap API to fetch and display real-time weather data, including temperature, descriptions, icons, and additional details like humidity and wind speed. The app features a 5-day forecast, unit toggle between Celsius and Fahrenheit, and robust error handling for invalid inputs or API issues. Demonstrated skills in API integration, asynchronous programming, and responsive design, ensuring cross-device compatibility and an intuitive user experience.
